- **Transliteration:** All non-Roman alphabets must be transliterated; authors are responsible for their consistency and accuracy.
- Manuscripts must consistently conform to *The Chicago Manual of Style, 18th Edition* (CMS). Examples of reference citations for journal articles and books are shown below. For more examples, please check CMS.
- Picture files should be submitted in either JPG or TIFF. Resolution should be at least 300 dots per inch (dpi), though 500 dpi is preferable. Size should be at least 2.25 inches in width.
- These images should be uploaded as separate items on the "Attach Files" page on [www.editorialmanager.com/bustan/](http://www.editorialmanager.com/bustan/) with the contact information of the creator of the images, in the event a second image is needed.
- Images should not be resized or resolution reduced.
- If the submission includes figures, tables, or large sections of text that have been published previously, the author has obtained written permission from the original copyright owner(s) to reproduce these items in the current manuscript in both the online and print publications of the journal. All copyrighted material has been properly credited in the manuscript. For the

Penn State University Press permission form please go to:

[http://www.psupress.org/Journals/journals\\_permissions.asp](http://www.psupress.org/Journals/journals_permissions.asp). Copies of permission letters should be sent to the Pennsylvania State University Press.

- Authors provide **alt text** to describe image content (for figures, charts, and tables) to ensure accessibility for individuals using screen readers. Please see the **PSU Press Alt Text Guide on page 9** for further information on writing alt text.
- Authors guarantee that the contribution does not infringe any copyright, violate any other property rights, or contain any scandalous, libelous, or unlawful matter.
- Authors guarantee that the contribution has not been published elsewhere and is not currently under consideration elsewhere.

- No function of "Track Changes" should be in use. Please check your document for any remaining tracked changes, hidden text, or comments, and delete them.
- "Style" field should read "Normal" throughout text.
- Use "main headings" and "subheadings".
- Subheads may be placed in italics to distinguish them from a full heading.
- When omitting part of a sentence with an ellipsis, use three periods with a space before, in between, and after (" . . . and . . . "). When using a four-period ellipsis, the first is a true period, and the following should be spaced as above.

- Epigraphs and extracts from other texts should be set off with line spacing—do not format an indent. On the line after an epigraph, be sure to include the name of the author and the source; do not use an endnote.
- Use single spaces following periods between sentences throughout the manuscript.

- The text of the review must be double-spaced.
- The reviewer’s name, employer affiliation, and email address must be indicated at the end of the review.

### **Tips for Writing Abstracts**

An abstract allows readers to quickly and accurately identify the basic content of your article. It is an invaluable research guide because it is most often what potential readers use to decide whether your article is relevant for them.

#### **Abstracts at a Glance:**

- Condensed version of the article
- Highlights the major points covered
- Concisely describes the content and scope of the work
- Helps readers decide whether to read the entire article
- Provides readers with a preview of research
- Contains relevant keywords for searching and indexing

Many online databases, such as the Scholarly Publishing Collective, use both abstracts and full-text options to index articles. Therefore, abstracts should contain keywords and phrases that allow for easy and precise searching. Incorporating keywords into the abstract that a potential researcher would search for emphasizes the central topics of the work and gives prospective readers enough information to make an informed judgment about the applicability of the work.

#### **Writing Tips**

An abstract is a self-contained piece of writing that can be understood independently from the article. It must be kept brief (approximately 100–200 words) and may include these elements:

- Statement of the problem and objectives (gap in literature on this topic)
- Thesis statement or question
- Summary of employed methods, viewpoint, or research approach
- Conclusion(s) and/or implications of research

*Keep in Mind...* Depending on your rhetorical strategy, an abstract need not include your entire conclusion, as you may want to reserve this for readers of your article. The abstract should, however, clearly and concisely indicate to the reader what questions will be answered in the article. You want to cultivate anticipation so the reader knows exactly what to expect when reading the article—if not the precise details of your conclusion(s).

**Do**

- Include your thesis, usually in the first 1–2 sentences
- Provide background information placing your work in the larger body of literature
- Use the same chronological structure as the original work
- Follow lucid and concise prose
- Explain the purpose of the work and methods used
- Use keywords and phrases that quickly identify the content and focus of the work
- Mimic the type and style of language found in the original article, including technical language

**Do not**

- Refer extensively to other works
- Add information not contained in the original work
- Define terms
- Repeat or rephrase your title
- Use first-person pronouns in abstracts. So, instead of, “In this article, I analyze,” use: “This article analyzes”

**Examples**

The abstract should begin with a clear sense of the research question and thesis.

“While some recent scholars claim to have refuted the relevance of stylometric analysis for Plato studies, new technological advances reopen the question. This article uses two recently completed stylometric analyses of the Platonic corpus to show that advanced artificial intelligence techniques such as genetic algorithms can serve as a foundation for chronological assertions.”

It is often useful to identify the theoretical or methodological school used to approach the thesis question and/or to position the article within an ongoing debate. This helps readers situate the article in the larger conversations of your discipline.

“The debate among Watts, Koupria, and Brecker over the reliability of stylometry (2009) suggests that . . .” or “Using the definition of style proposed by Markos (2014), this article argues that . . .”

Finally, briefly state the conclusion.

“Through analyzing the results of Watts and Koupria’s genetic algorithmic stylometry, the article demonstrates that they provide solutions to roadblocks previously identified in stylometric analyses of the Platonic corpus for the purposes of developing a reliable chronology. These solutions . . .”

## **PSU PRESS ALT TEXT GUIDE**

Penn State University Press is committed to making its publications accessible to the widest audience possible. The inclusion of alternative text (or “alt text”) will allow those using assistive technology to access the images and other graphic elements (such as tables, charts, graphs, and maps) in the digital formats of articles. Authors are encouraged to submit alt text (and where necessary, extended descriptions) for all images and other graphic elements in their manuscripts.

*Note:* If sufficient information about the image is included in the caption or the text, alt text may be unnecessary.

### **General Guidelines for Composing Alt Text**

Alt text should clearly and concisely describe the content and function of an image. Please limit the description to the most important elements of the image. In most cases a one- or two-sentence description, consisting of no more than 250 characters (not including spaces), should suffice. If more than 250 characters are needed to convey the content and function of an image, please provide an extended description in addition to the alt text.

### **Extended Description**

For more complex images and graphic elements (such as graphs, charts, and maps), please provide an extended description with the necessary information. Any visible English text in an image must be transcribed in the extended description. Please note that images requiring an extended description must also have the shorter alt text.

### **Formatting and Submitting Alt Text**

Alt text should be submitted along with captions. The alt text for a figure should be set on a new line after the caption and should be preceded by <alt text>. An extended description, when necessary, should be treated in a similar manner, preceded by <extended description>. When drafting and formatting alt text, you should:

- capitalize acronyms so assistive technology reads them as separate letters and not words (e.g., US versus us);
- avoid complex symbols, such as brackets, quotation marks, dashes, ellipses, and mathematical symbols, as assistive technology does not treat all of these symbols consistently;
- write in complete sentences but avoid overly complex sentence structures.

For examples as well as additional information and resources, see [here](#).
